

# Master in Spinology

2022

## European Spinology Tutorium

## A necessary and emerging profession

If we ask - do we need Spinologists in the world in which we live,? the answer is resounding yes! The current way of life of man brings endless possibilities of losing the ideal integrity and dynamics of the spine, i.e., having spinal occlusions. From childhood, we are exposed to shocks, falls, stress, strain, fears, weaknesses, these are all possible causes of spinal occlusions.

**Spinology is a vitalistic profession with a philosophy and a spinal maintenance technique, essential to the greater wellness and vitality of all people!**

In adulthood, life is often even more complicated and stress is the major negative in our bodies and in our lives. This situation can be reversed. The contribution of Spinology is to help as many people as possible make the most of their lives.

Concepts like "caring" and "maintenance" override the traditional "treatment" concept.

The Spinologist works with individuals, with families, sports teams, & businesses. The purpose of Spinology is not to treat or cure anything, but rather to enhance the overall performance of an individual...mentally, emotionally & physically..

The European Spinology Tutorium (formerly European School of Spinology) started teaching training programs back in 1986.

It currently has its headquarters in Valencia. The Advanced Spinology Diploma for DCs is designed to train qualified chiropractors who are committed to work with anyone seeking their services.

The "market" of potential clients is limitless as we do not hold ourselves to work only with people with health issues, but with people who want to increase the quality & quantity of every aspect of their lives!

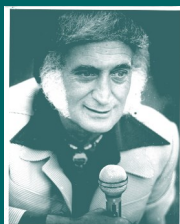

**Dare to share with us:  
the project to help  
many people get more  
out of life!**

### Points of special interest:

- Spinology is a classical technique used by Reggie Gold in chiropractic's golden age, before the complexities of insurance and unnecessarily complicated techniques, when a chiropractor sank or swam based upon client satisfaction because the client was paying out of pocket.
- It is a way of getting back to the fundamentals of evaluation and correction (and payment?).

## Following in Reggie Gold's footsteps

*Shortly before Reggie Gold passed, I spoke with him to find out information firsthand about the situation of the chiropractic profession in your country and to get his feedback on the plan I am going to present to you. Reggie, like many of you said, thought this is the right time for this move and fully supported my idea.*

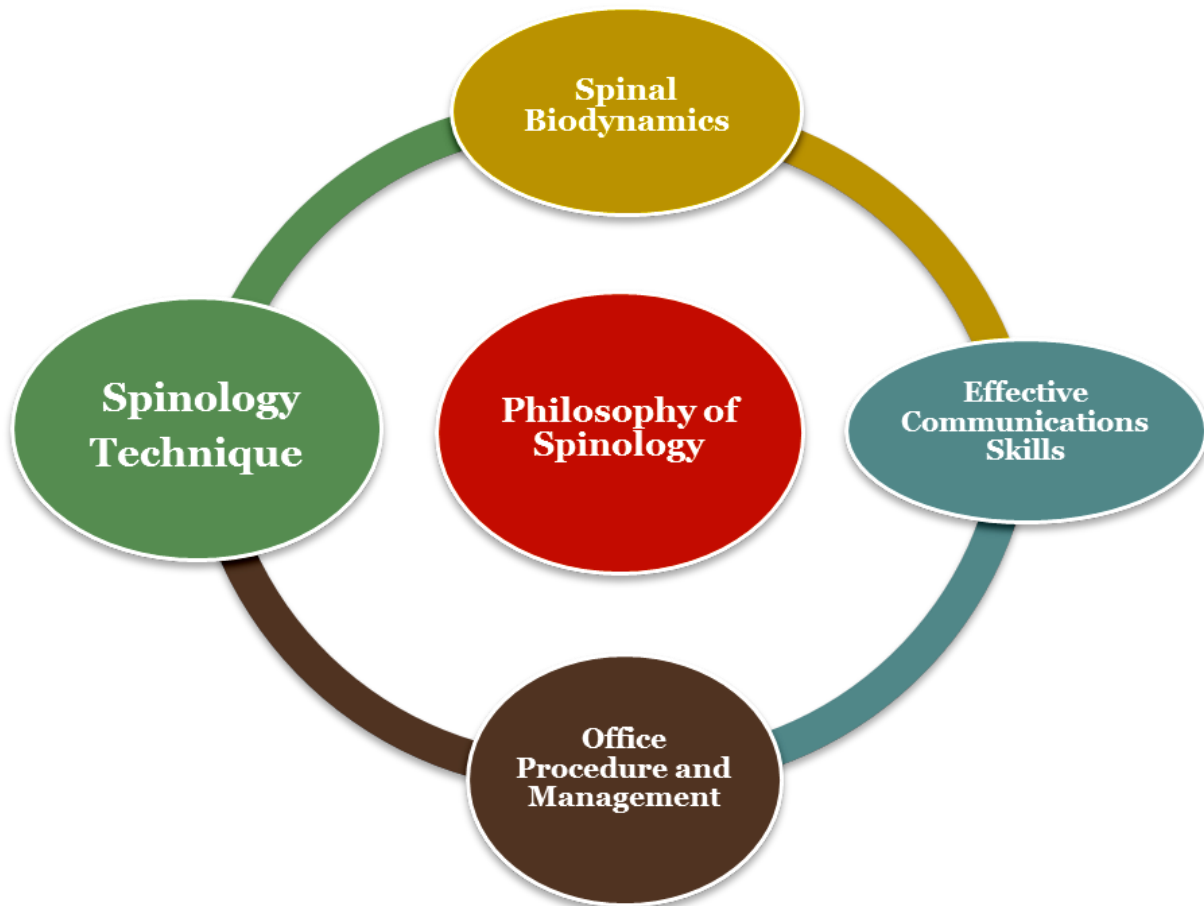

*"I am delighted with the idea of having more practitioners committed to the mission of Spinology. I can tell you from my own experience, that practicing with the focus on locating & correcting spinal occlusions simply for the greater expression of Life, is a paradigm shift that will greatly enhance the impact you make on the world.*

*Our school's team would like to share this with you; let us see what we can do together!"*

*Fririque Borredá, López*

*Director of European Spinology Tutorium*

"Spinalogy as a technique, offers a direct method of analysis and correction which is tried and true. Besides your favorite technique, many doctors would like to have a low tech approach in their arsenal which requires only your hands. No X-rays or instruments are used, a truly elegant and low tech way of getting the job done independent of any form of technology, just palpate and adjust. So where ever you are, where ever you need it, you have a skill that can be applied rapidly to any age client. In the office, camping, on the battlefield, on vacation, you can be confident that you can handle the situation when the lights go out".

"Our advanced course teaches you how Spinalogy is practiced in Europe and was practiced by Reggie Gold with the only purpose to broaden your perspective on spinal correction. We do not endorse the use of any particular method as this is professional prerogative".

## EUROPEAN SPINOLOGY TUTORIUM

- **Vicente Sancho Tello 19, 5ª**  
**46021 Valencia, Spain**  
**Phone: 34 960052734 / 616792682**
